

ROLLERPACK PRINTER

Top Printing

Free Running Unit

Indexed Rotation Unit

Foscott Packaging

Unit 1

12 Carolsteen Avenue

Helens Bay

Co.Down

BT19 1LJ

United Kingdom & Ireland

Rollerpack Printer with indexed rotation automatically marks a code, product / batch number, and or any printed information required.

The printer comes in a choice of 3 sizes of printing height.

**25mm, 50mm,
100mm**

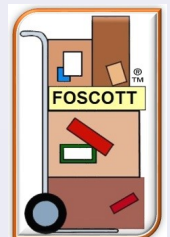

Total circumference
of the drum wheel is
430mm

Operating Principle

The print is firmly applied onto the substrate to be marked. The marking drum is driven by the product. The Baselock rubber type characters are fixed by pressure on the drum and are automatically inked before each turn of the roller.

Rollerpack with indexed rotation makes an unique mark per carton and is always marked at the same position. A space proportional to the scrolling speed is necessary between each carton to reboot the drum.

Technical Characteristics

Model	Marking Size in mm	Number of Rings	Pre-inked Roller Size
430-25	430 x 25	8	63.5 x 25.4 x 26
430-50	430 x 50	16	63.5 x 25.4 x 50
430-100	430 x 100	29	63.5 x 25.4 x 100

Pre-inked Rolls
